

CAPABILITY STATEMENT

Neroshield specializes in advanced green-tech solutions, offering biodegradable, non-toxic fire retardants for a wide range of substrates. Our products provide effective fire protection while prioritizing safety, health, and environmental sustainability. We deliver innovative, ecofriendly solutions that meet the highest standards for both performance and compliance, helping organizations enhance safety without compromising ecological responsibility.

CORE COMPETENCIES

- **Biodegradable Fire-Retardant Solutions:** Development and application of eco-friendly fire-retardant chemicals that provide effective safety while minimizing environmental impact
- **Custom Formulation Services:** Tailored chemical solutions designed to meet industry-specific needs, ensuring optimal fire protection for a variety of substrates
- **Product Testing and Validation:** Comprehensive testing to assess the efficacy and safety of our fire-retardant solutions across different materials and applications

COMPANY SNAPSHOT

CAGE: 11CR5 | **SAM:** YQ7YMD2D8GH4

Gov. Business POC: Dan Stammen

Phone: (214) 228-0669

E-Mail: dan@neroshield.com

Address: 7466 Cortez Rd W
Ste. 257, Bradenton, FL 34210

Work Area: Worldwide

Non-Toxic

Water Based

Bio-degradable

Eco-Friendly

- **Technical Support and Consultation:** Expert guidance on the selection and application of fire-retardant products, ensuring seamless integration and maximum effectiveness
- **Sustainability Consulting:** Assistance in developing sustainable fire protection strategies that align with environmental goals and regulatory standards
- **Training and Education:** Workshops and seminars to promote best practices for using fire-retardant products, ensuring safety and compliance across industries

DIFFERENTIATORS

- **GREENGUARD Gold Certification:** Our fire retardants meet strict environmental and safety standards, ensuring health and sustainability.
- **Extensive Certifications:** We hold multiple industry certifications, ensuring compliance with key safety and regulatory standards.
- **Proven Efficacy:** Our products reduce peak heat release by over 65%, improving fire safety and reducing smoke production.

- **Advanced Thermal Regulation:** We enhance heat dissipation and reduce ignition risks, especially in wood frame structures and warehouses.
- **Innovative Aerosol Solutions:** Our aerosol technology offers efficient fire suppression without the need for government registration.
- **Versatile Applications:** Our fire retardants are effective in residential, commercial, and industrial settings, improving fire safety across sectors.
- **Proactive Loss Prevention:** We focus on fire risk mitigation to enhance safety in emergency and life safety scenarios.
